

How can humans survive in hot deserts?

What is a desert?

A desert is an area of land which receives **less than 25cm** of rain a year.
There are different types of deserts.

hot deserts

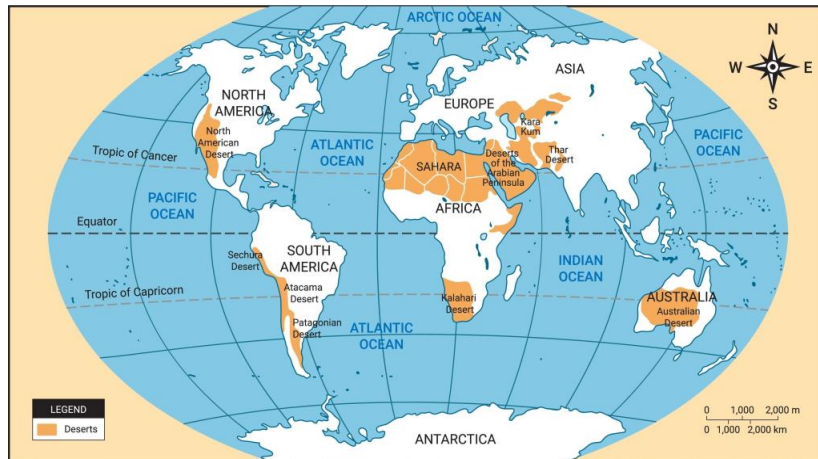

semi-arid
deserts

cold deserts

Where are the hot deserts?

Deserts have an **extreme** climate.
Hot deserts reach temperatures of **50°C** in the daytime but fall to **0°C** once the sun sets.

People build tents from goat hair to give them shade and shelter.

People look for plants, flies and mosquitoes to help them to find water.

People keep animals like goats, sheep and cows to give them meat and milk.

People move to find better land for their animals. Camels carry their belongings.

Key Vocabulary
