

Polar bears

Have you ever wondered about polar bears? If so, this report will tell you everything you need to know.

A Polar bear and its cubs.

Where do Polar bears live?

Polar bears live in countries around the Arctic: the United States, Canada, Russia, Greenland and Norway.

Fun Fact!

Polar bears are the largest carnivore that live on land.

What do Polar bears eat?

Polar bears are carnivores so they eat only meat. They feed mainly on seals but they may also eat walrus, whales and narwhals. They have a great sense of smell which they use to find their prey.
