

Please support your child to complete these part-part-whole diagrams. They can use practical resources if they need to, such as counters, lego bricks or other small items.

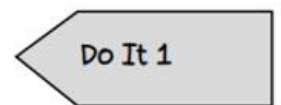

Please use language such as:

*You have 10 bricks - how many more do you need to make 17?*

*So 10 plus / add 7 equals 17.*

*Or we could say that 7 plus 10 equals 17.*

*10 and 7 makes 17 altogether.*

Complete the part-part-whole diagrams. The whole is 17 every time.
