

## Subtract from 18 Game

Play It 2

You need:

Counters or colours for each player

Number Facts 18 Board (on the next page)

To play:

Every time it is your turn choose a number on the board to subtract from 18 and cover (or colour) it. Find the answer on the board and cover, (or colour) that too, so each turn you cover two numbers on the board.

Say your number fact aloud.

The two numbers you cover do not need to be next to each other on the board.

For example:

Player 1: I will subtract 8 from 18 so will cover an 8 and a 10 on the board because  $18 \text{ subtract } 8 \text{ equals } 10$

To win:

The winner is the first player to cover 5 numbers in a line, horizontally, vertically or diagonally.
