

## Geography

This week we are exploring how we can measure weather.

Please watch this video below:

<https://www.bbc.co.uk/bitesize/clips/z9g87ty>

Can you create a rain gauge? Put the rain gauge outside and record how much rain falls each day.

## Science

This week is Science Week and in Year 1 we are exploring the text Ada Twist, Scientist. If you don't have a physical copy of the text, there are some read along videos on YouTube. We are picking out some keywords from the text (observation, experiment, hypothesis, curious, quest) and ensuring the children understand their meaning.

We are also creating a Frayer Model for the word '[curious](#)' - the template for this has been provided.

## Religious Education

We are reading the parable 'The Lost Samaritan' and a PowerPoint for this is provided. What message does this parable teach us? Can your child think of how they can show kindness to everyone in school?
